Experiential Learning for Career Readiness!

Students gain five semesters of supervised clinical experience in University Athletics, local high schools, and other off-campus clinical sites.

Hands-on learning prepares students to succeed in a variety of employment areas.

Schools and Universities

Sports Medicine Clinics

Public Safety

Recreation Departments

Hospitals and Wellness Centers

As people become more aware of sports-related injuries at a young age, demand for athletic trainers is expected to increase.

Some states require public secondary schools to employ athletic trainers as part of their sports programs. In addition, growth in an increasingly active middle-aged and elderly population will likely lead to an increased incidence of athletic-related injuries. Finally, military bases hire athletic trainers to help train and rehabilitate injured military personnel.
