Mental Illness Awareness Week 2018

This is the 14th year the Social Work Department has hosted a panel discussion during Mental Illness Awareness Week. This year we address the broader issues of needing a workforce to meet the growing demand and recognition that mental health be addressed across the continuum of care and from infancy to older age.

Presentations will discuss contemporary issues addressing and treating mental illness, the stigma of mental illness, and career/professional opportunities for those entering the mental health field.

Wednesday, October 3 | 7:00pm – 8:15 pm
MUB Theater II
Sponsored by the Department of Social Work
